COURSE : Implementation (Utilities) - (M012)

OBJECTIVE :

- Enable participants to understand the basic AS/400 concepts and to master Os/400 utilities, the Control Language and Object management.

PREREQUISITES :

- No prerequisites though having some prior knowledge or experience of basic computing will be advantageous.

AUDIENCE :

•New users of the IBM AS/400 computer system
•Upgrade users to AS/400 from the IBM mid-range System/3X series
•Programmers and administrators for the IBM AS/400 computer system

WHAT YOU WILL LEARN :

•About AS/400 concepts and OS/400 Programming utilities.
•Creating CL programs, commands and menus.
•Configuring and managing AS/400 objects.
•Implementing and fine tuning AS/400 system performance.

METHOD :

•Hands-on oriented training with one workstation for each participant
•Lecturer-assisted and use of computer-generated slides for presentations
•Training materials which includes notes with key points and graphics layout

DURATION : 5 days (approximately 35 hours)

COURSE CONTENT :

Module 1: Implementation (Utilities)

Duration : 1 1/2 day

Audience : Programmers

- Understanding AS/400 concepts
- System start-up and shutdown
- AS/400 menus & CL Commands

- Use of objects and libraries
- Create objects for user application:
    - User profiles
    - Libraries
    - Device description
- Physical, logical and display files
- Backup and Restore
- Disk space housekeeping
- Message handling
- Monitor job queues
- Device management
